

Job description

We are looking for a Front-End Software Engineer who likes to work in a flat-structured, tech driven, friendly and fun environment.

The role, based in Stockholm, involves close collaboration with the product management team as well as fellow engineers and testers. As a Front-End Software Engineer, you will create and further enhance the Mitigram user experience by providing a simple, robust and intuitive UI. We utilize short releases and agile practices where time from idea to market is minimized, while keeping a high product quality. You will primarily work on the existing codebase while at the same time modernizing the frontend of our application.

To be successful in this role you voice your opinions, you like to take responsibility for - and influence your own work as well as the company's effort as a whole.

Front-End Software Engineer

Ideally experienced in:

- At least 4 years as a front end engineer developing complex web applications
- JavaScript – ES6 and beyond
- TypeScript, and appreciating its advantages
- Libraries and frameworks such as Angular, Vue, React and/or Svelte
- CSS and very beneficial if you also have experience with Sass
- Creating cross-browser and responsive web experiences and understand the nuances of supporting tablet and mobile browsers
- Experience with JavaScript testing with good appreciation for TDD

Bonus experiences:

- In-depth knowledge of the Kendo UI framework
- Node, Redux, RxJS, NgRx, webpack, React Native and native app development
- Strong object-oriented fundamentals with prior experience in ASP.NET MVC and C#
- Docker
- Eye for design and UX/UI
