

# Job description

## Technical Product Manager

We are looking for a **Technical Product Manager** who likes to work in a flat-structured, highly dynamic, friendly and fun environment.

The role, based in Stockholm, reports to the Chief Product Officer and requires close collaboration with stakeholders, the technology organization and the product management team on planning and implementation of our technical roadmap. This roadmap is aimed to deliver a secure and scalable service infrastructure that will a) ensure compliance and regulation acceptance by Mitigram's corporate and bank clients, b) support end-to-end connectivity of the Mitigram solution in a larger eco-system, as well as c) support exponential growth of the Mitigram client base.

To be successful in the role, you first and foremost love tech, and the value that tech-based solutions can bring to businesses and its customers. You are an enthusiastic team player, who plans and can drive teams to get product to market. You have an ability to rapidly understand complex dependencies, envisage solutions to issues, and assist the teams in implementing them. You do not need to be right (all the time) and you always focus on finding the optimal solution to sometimes seemingly conflicting needs.

# MITIGRAM

Mitigram is one of the **most exciting** Fintech companies in the Nordics. Strong growth, among the **world's largest** corporates and banks as our clients, and leading investors ensure we have a lot of exciting challenges and opportunities for anyone that joins at this stage.

Mitigram has developed a **world leading online marketplace** built for the Trade Finance community. Our product is recognized by thousands of individuals from Montevideo to Shanghai. We are the **fastest growing** Trade Finance network in the market, and we are looking for someone to help us drive our growth.

Trade Finance itself is the part of banking that supports trillions of dollars' worth of trade every year, **facilitating business** between buyers and sellers across the globe. Without Trade Finance the world would literally stand still.

The Mitigram team is **highly diverse** with members from 15+ countries from leading institutions in trade, investment, risk management, software, security and compliance.

#### What you will do

- Manage Mitigram's technical roadmap, which includes topics like:
  - Security for user authentication & data storage
  - Platform scalability & performance
  - Distribution & interoperability
  - Logging & monitoring
  - Scalable development
- Collaborate with product management and technology teams to analyze, design, and specify roadmap opportunities and capabilities
- Take part in and contribute to our prioritizations cross objectives to ensure quick time-to-market and optimal use of our resources
- Project manager for company-wide technical and infrastructure implementations
- Articulate Mitigram's service infrastructure strategy in marketing and sales material as well as present it to prospects and clients

#### Who you are

- Helicopter vision, seeing the whole picture, and can drill down when needed
- Ability to clearly articulate and visualize dependencies and risks
- High logical and cognitive capacity
- Highly organized
- Good in written and oral communication (English)
- Good in visual communication (sketches, diagrams, presentations)
- Surely, needs to love country music and bad humour

#### You should have

- 7+ years of experience as a technical product manager, release manager or similar
- Engineering background
- Deep understanding of cloud/on prem infrastructure and API-architecture
- Understanding of
  - Capacity planning
  - Common scaling mechanisms and problems
  - Common security mechanisms and best practices
